

PUBLIC NOTICE
Devon Energy Production Company, LP
Cotton Draw Gathering Gas System Project

June 10, 2015

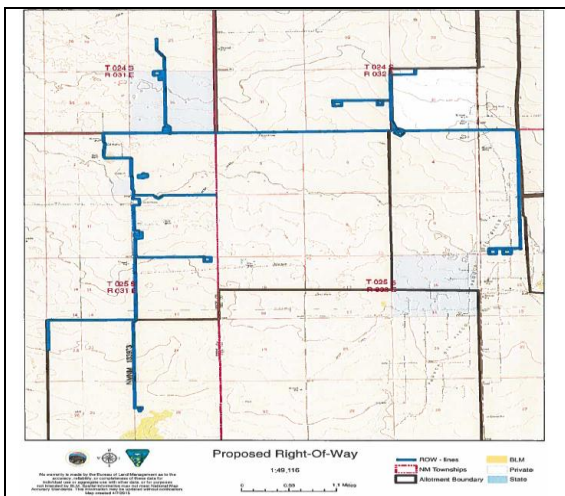

The Bureau of Land Management (BLM) Carlsbad Field Office is initializing public scoping for the Devon Energy Production Company, LP., for the Cotton Draw Gathering Gas System. The BLM is the lead federal agency for the undertaking, which is proposed to cross federal, state, and private lands.

The applicant, Devon Energy Production Company, LP, is proposing to construct 50 miles of gas gathering system in Eddy County and Lea County, New Mexico, approximately 20 miles southeast of Malaga, NM.

An Environmental Assessment (EA) would be required under the Nation Environmental Poly Act and Council for Environmental Quality regulation in order to assess the potential effects of the proposed gathering system, upon environmental resources in the project area. Through the internal BLM process for identifying issues to be analyzed in the EA, The BLM has identified the following resources: air quality, cultural resources, wildlife and special statues species, soils, livestock grazing, noxious weeds and invasive species, vegetation and water resources.

Specific details about the project, including a map of the proposed alignment, are available on the Carlsbad Field Office webpage at: [http://www.blm.gov/nm/st/en/fo/Carlsbad Field Office.html](http://www.blm.gov/nm/st/en/fo/Carlsbad%20Field%20Office.html)

Scoping gives the public an opportunity to tell the BLM what issues and concerns they think should be addressed in the subject project's EA. Comments concerning the proposed action, alternatives, and identifications of environment issues are most helpful. BLM is requesting comments be submitted within 30 days from the date of this notice.

Written comments should be addressed to:
